

## Languages

- **Good level of knowledge**
  - Java
  - Kotlin
  - Rego (OPA Authorization language)
- **Base level of knowledge**
  - Go
  - Bash Scripting
  - Javascript
  - Typescript

## Frameworks

- **Good level of knowledge**
  - Quarkus
  - Spring Boot
  - Java EE
  - Hibernate
  - Apache Camel
- **Base level of knowledge**
  - Akka
  - NodeJs
  - Kafka Streams

## Backend Programming

- **Good level of knowledge**
  - Rest API
  - Relational database (MySQL, Postgres)
  - OAuth with Keycloak (identity provider)
  - Open Policy Agent for authorization
- **Base level of knowledge**
  - NoSql database
  - Key value database

## Microservices Related skills

- **Good level of knowledge**
  - Event sourcing via *outbox pattern*
  - Kafka messaging
- **Base level of knowledge**
  - Kubernetes (it is a tough one, even though I know how to configure deployments/stateful sets along with their configmaps, volume and secrets, networks etc. I learn something new every day or I find out that I only grasp the basic of one particular thing)
  - ArgoCD
  - Travis CI
